

Air O Agri Standard

➤ For fruit and vegetables

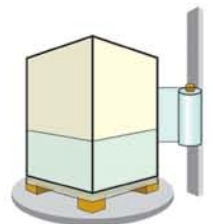

Ideal for fruit and vegetables that have high levels of water content and would normally deteriorate quickly without good aeration.

Because of the large openings Air-O-Agri gives **maximum aeration which prevents product deterioration and allows normal ripening.** Moreover, Air-O-Agri gives excellent **pallet stabilization due to its superior elongation and strength.**

The key characteristic of the film is that **it does not have a net structure.**

Therefore it is easy to handle during manual wrapping and unwrapping process and it does not tangle in the wheels of forklifts.

This film is ideal for the fruit and vegetable sector.

Air-O-Agri

THE NEW GENERATION IN PACKAGING MATERIALS

Air-O-Agri is a macro-perforated stretch film.

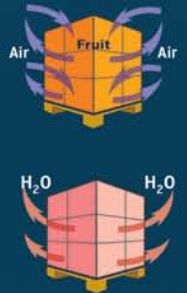

The concept of Air-O-Agri is to offer a breathable stretch film which in combination with its maximum elongation and strength, can fulfill the requirements of tight wrapping of goods on to a pallet.

An added benefit of Air-O-Agri is the environmentally friendly nature of the product. Industry and Government legislation now demand products which use less material and are easy to recycle.

State-of-the-Art technology is used for the production of Air-O-Agri. The innovative production method is protected by International and European patents (patent pending).

You might consider the use of Air-O-Agri for the following products

Biological products: need of oxygen for biological reasons "breathing" (e.g. fruits and vegetables, etc.).

Advantages of Air-O-Agri

1. CONSIDERABLE LOWER WASTE VOLUME

Because of its innovative design Air-O-Agri has a smaller volume waste after unwrapping than other kinds of similar products.

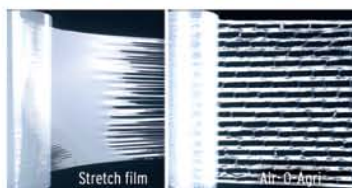

2. STOPS CONDENSATION ALLOWS VENTILATION

Air-O-Agri due to its large openings delays fruit and vegetable spoilage and allows normal ripening of fruit and vegetables.

3. MAXIMUM ELONGATION AND STRENGTH

Air-O-Agri has the capability of maximum elongation and strength in order to give perfect pallet stabilization and excellent pallet appearance.

4. NO REDUCTION IN WIDTH

Regular stretch film and knitted net reduce in width after stretching. Air-O-Agri keeps its width after stretching thus you will save cost and time.

5. FORKLIFT FRIENDLY

Unlike netting, Air-O-Agri does not tangle in the wheels of forklifts

6. GOOD GRIP

Air-O-Agri elastic qualities have a tendency to contract and therefore produces a tighter wrap of the palletised goods. Despite the perforations the pallets stay stable during transportation and storage.
